

Weihrauch 400

The Indian traditional extract in tested quality as brand raw material Boswellin®.

The beneficial effects of incense have been known and researched for centuries. The Indian incense (*Boswellia serrata*) belongs to the balsam tree plants. The plant resins from the incense tree are traditionally used for the production of incense, essential oils and extracts.

Modern science has also rediscovered this valuable plant and found numerous positive influences of *Boswellia serrata* extracts on well-being. Frankincense helps mental function and supports the mucous membranes of the digestive tract as well as the joints.

The extract of the natural tree resins is contained in Biogena Weihrauch 400 in the form of the brand raw material Boswellin®. With a very high proportion of 70 % total boswellic acids and additional standardisation to beta boswellic acids, Biogena relies here on proven premium quality.

Weihrauch 400

- With high-quality extract from the tree resin of *Boswellia serrata*
- Frankincense supports mental function
- Frankincense contributes to the maintenance of the mucous membranes of the digestive tract
- Frankincense contributes to cooling and well-being of the joints
