

# Liver Bile Formula

## Plant substances for the liver and gall bladder

### Metabolic factory of the liver

The liver is the largest metabolic organ of the human body. It utilises the nutritional components ingested through our food, produces proteins, serves as the storage organ and regulates the endocrine and immune systems. However, unlike any other organ, the liver needs to cope with many excretory substances. Thus, alcohol, drugs and environmental pollutants can make demands on the most important excretory organ. Therefore, providing nutritional support to the liver and its helper, the gall bladder, is all the more important. Plant extracts have been used for such purposes for a long time. Hence, the selected plant extracts from artichoke, milk thistle and dandelion support a normal digestion and in doing so, help maintain a normal liver function. Artichoke and milk thistle contribute to a normal production of bile.

### Leber Galle Formula: Plant extracts for the liver and gall bladder

Biogena Leber Galle Formula contains selected plant extracts to provide the liver and gall bladder with nutritional support.

### Possible uses:

- For the targeted support of the liver, particularly in times of heightened stress
- To support the production of bile

### Bioavailable micronutrients in a pure form:

- According to the pure substance principle
- Without colours, flavours or glazing agents
- Gluten-free
- Lactose-free
- Vegetable capsule shell
- 100 % vegan
- Quality tested
